Printing

USE A4 SIZED PAPER WITH A PAPER WEIGHT OF 160 / 200 GRAMS. THIS IS STRONG ENOUGH TO DO THE JOB AND STAY NICE FOR QUITE SOME TIME. ALSO STILL ABLE TO CREASE AND FOLD NICELY.

Cutting

CUT OUT ALL THE CONTINUOUS OUTLINES TO CREATE ALL THE PARTS FOR ASSEMBLING. USE YOUR SCISSORS OR EVEN BETTER, THIS KIND OF KNIFE:

(SAVES TIME & MORE ACURATE)

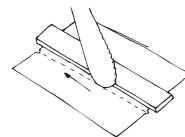

CUT

Score / Crease

THIS IS AN IMPORTANT STEP TO MAKE PERFECT FOLDS WITH HEAVY PAPER.

TRACE ALL THE FOLDING LINES WITH AN EMPTY BALLPOINT PEN, THE BACK OF A BUTTER-KNIFE, A FOLDING BONE, PAPERCLIP OR ANOTHER SCORING TOOL. A PROFESSIONAL SCORING TOOL IS RECOMMENDED.

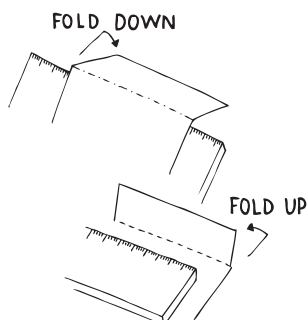

PLACE THE LATH ALONG THE FOLDING LINE AND DRAW YOUR TOOL ALONG THE EDGE. PUSH FIRM AND PRACTICE WITH PAPER LEFTOVERS FOR BEST RESULT.

Folding

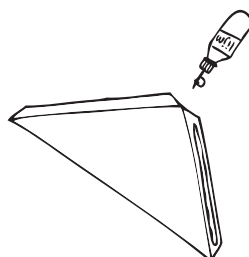

USE YOUR RULER ON THE EDGE OF YOUR TABLE WHEN FOLDING DOWN.

FOLD UP
FOLD DOWN

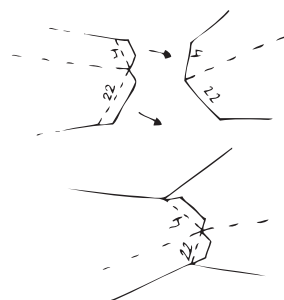

Glue

ADD A SMALL STRIP OF GLUE ON A TAB AND LET IT DRY FOR A FEW SECONDS. PLACE THE TAB ON THE CORRESPONDING PAPER PART, PUSH AND HOLD IT FOR A MOMENT. GLUE TABS ONE BY ONE.

Assembling

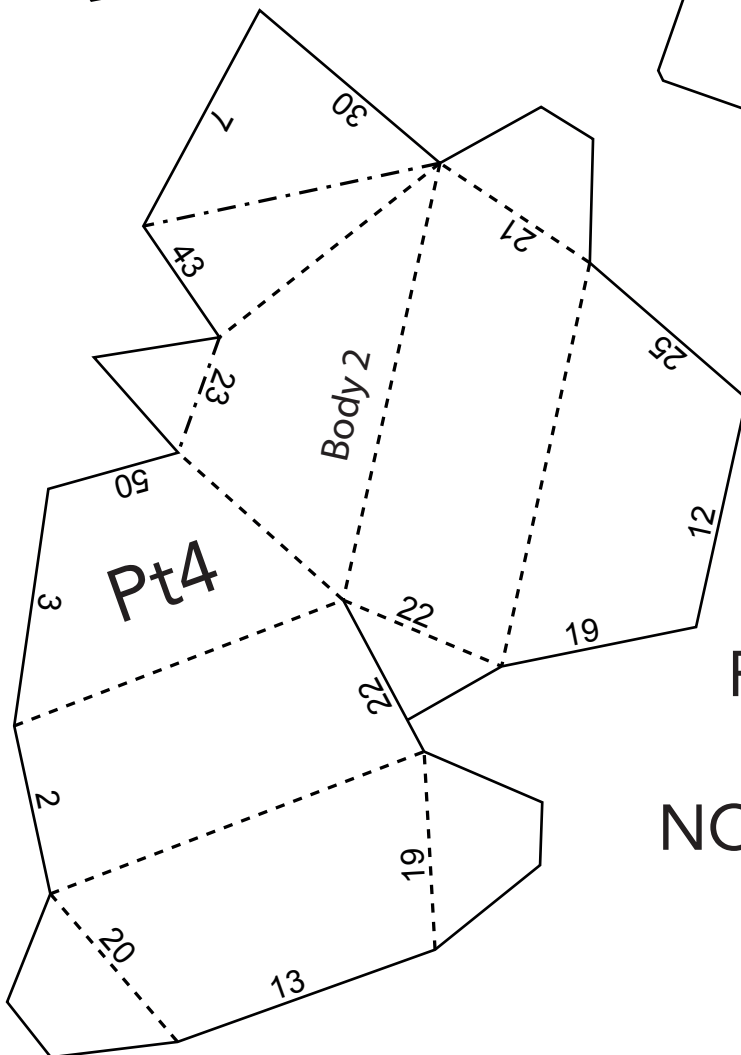

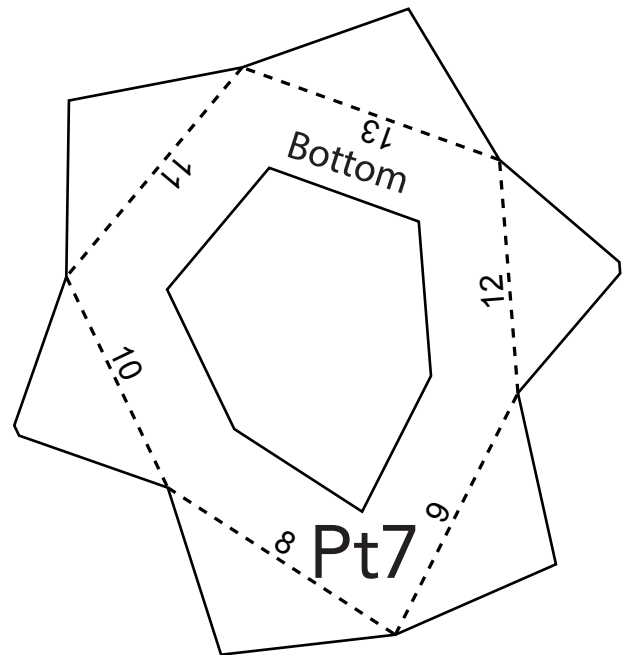

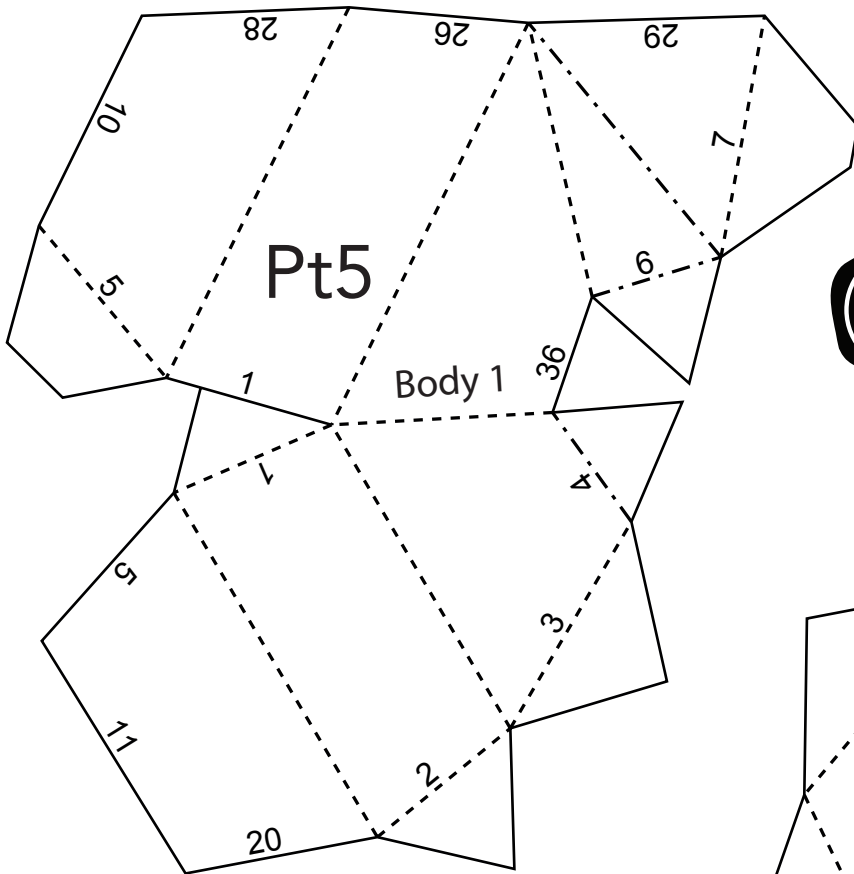

ALL NUMBERS INDICATE THE PLACE FOR CORRESPONDING TABS. THEY ARE NOT NUMBERED CHRONOLOGICALLY SO DON'T MIND THE RANKING. WHILE YOUR GLUEING AND HOLDING THE TABS, IT'S ADVISED TO USE THE TABLE AS MUCH AS POSSIBLE.

FOLLOW THIS GUIDELINE :-)

Start with assembling ducky's head by finishing Pt1 first, followed by Pt2. Than start joining these two parts with tabs 40 and 31. Continue with the other tabs and insert the beak Pt3.

Finish Body Pt4 first and follow up with Body Pt5. Join these together. Connect the finished duck head with the Body. Once the head is installed you can continue with adding the duck tail Pt6 and finish the sculpture with the bottom part Pt7. You are ready! :-)
